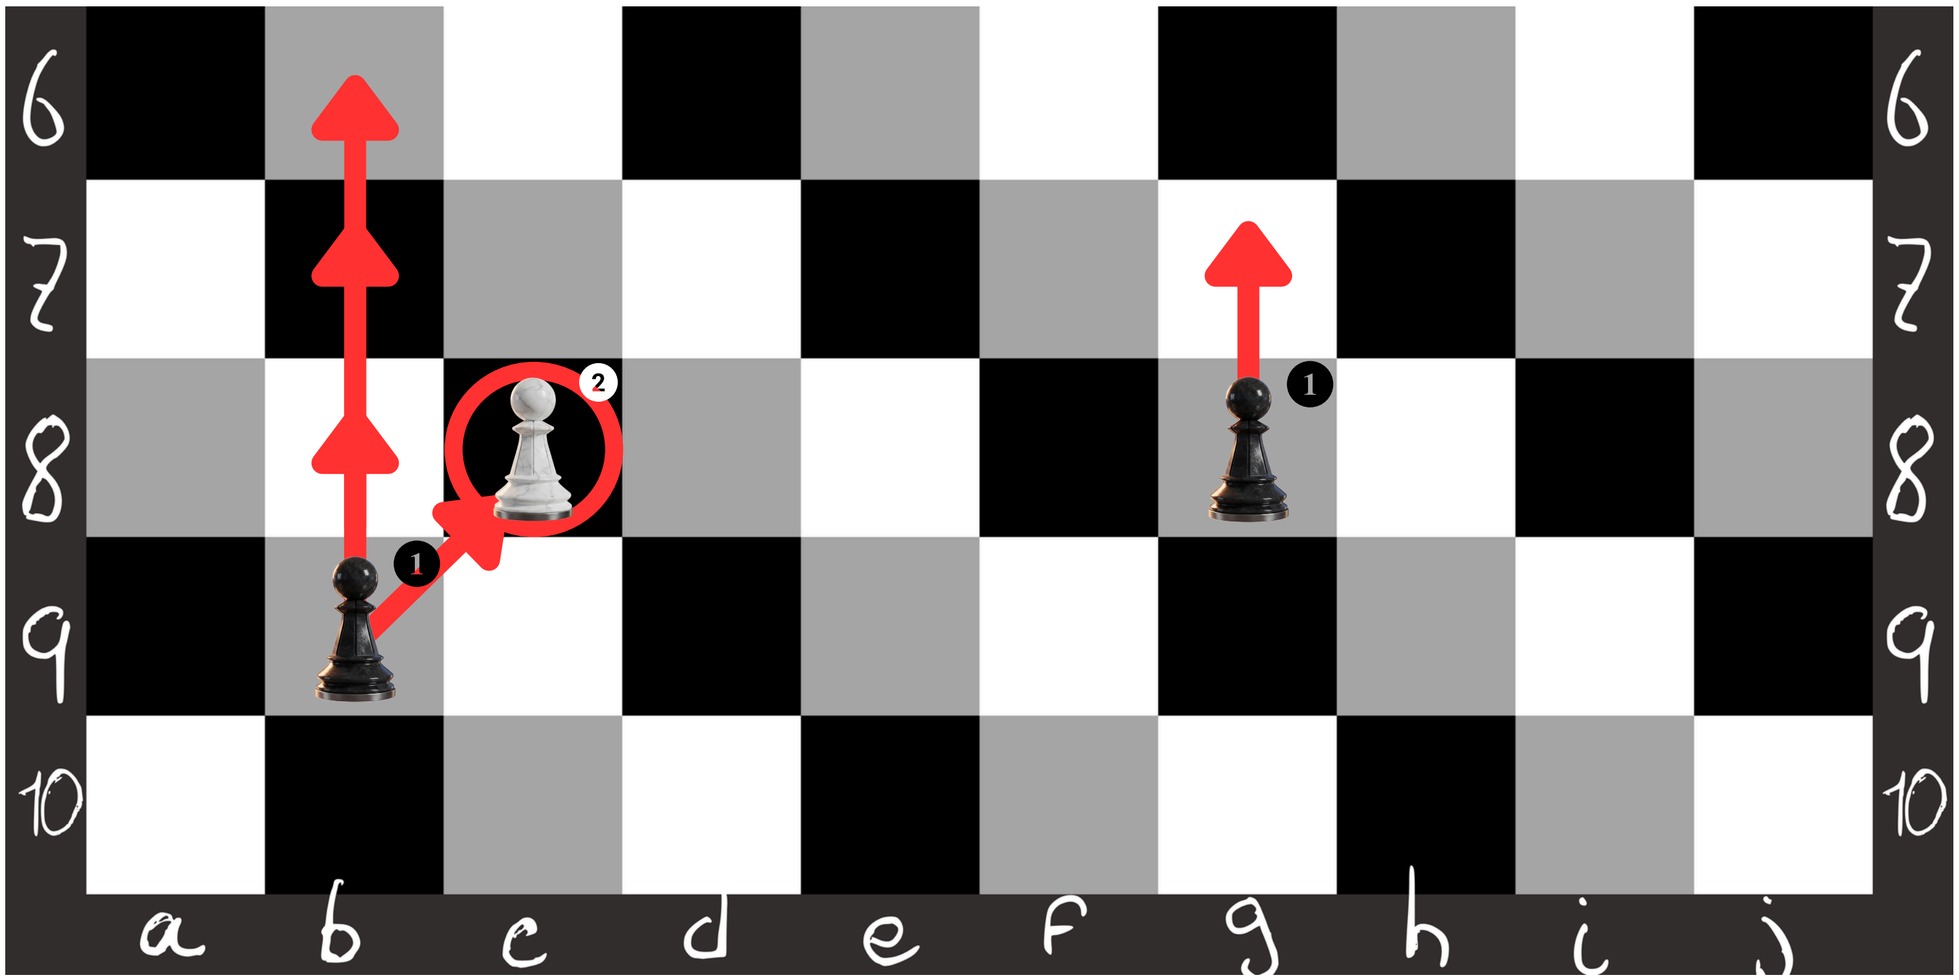
Chess 2.0

How to move the pieces

Pawns

To move (1): At the beginning the player can move up to 3 squares. Then only 1. They cannot jump over pieces.

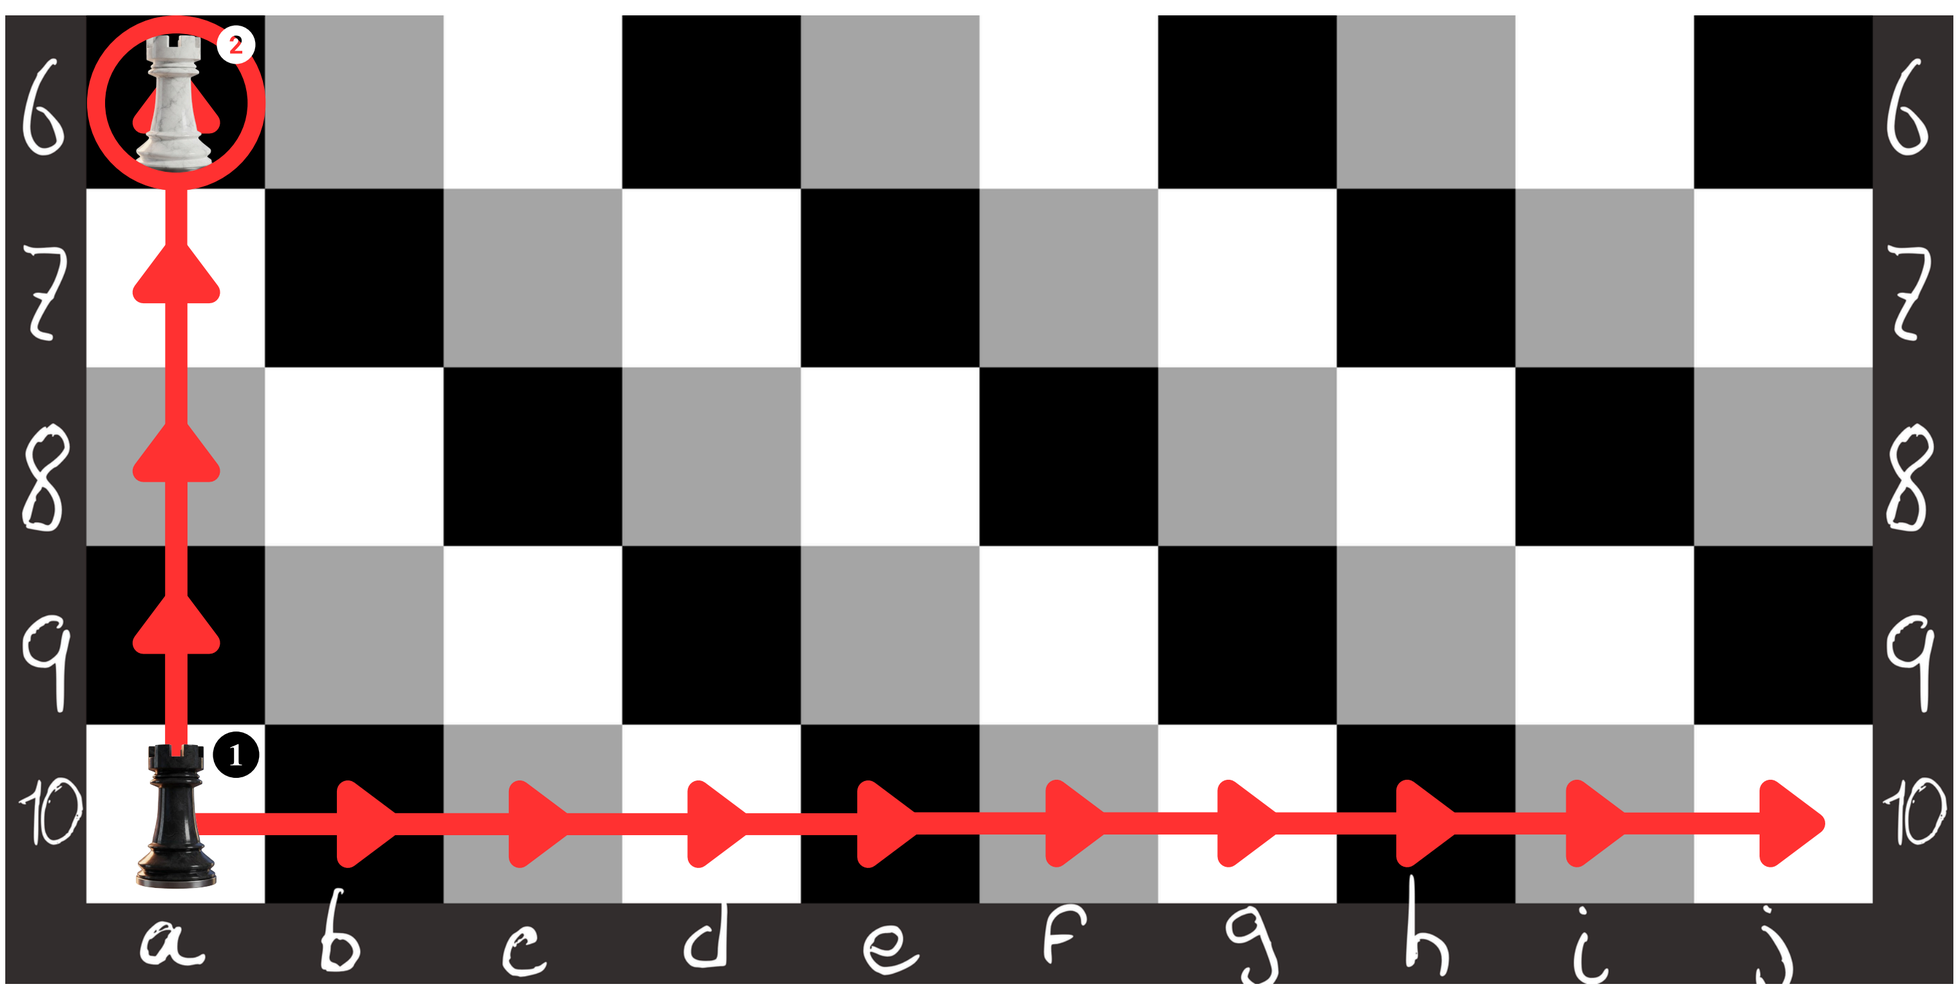
To eat (2): eat the piece that is diagonally across it.



Towers

To move (1): the number of squares the player wishes up, down, left or right. They cannot jump over pieces.

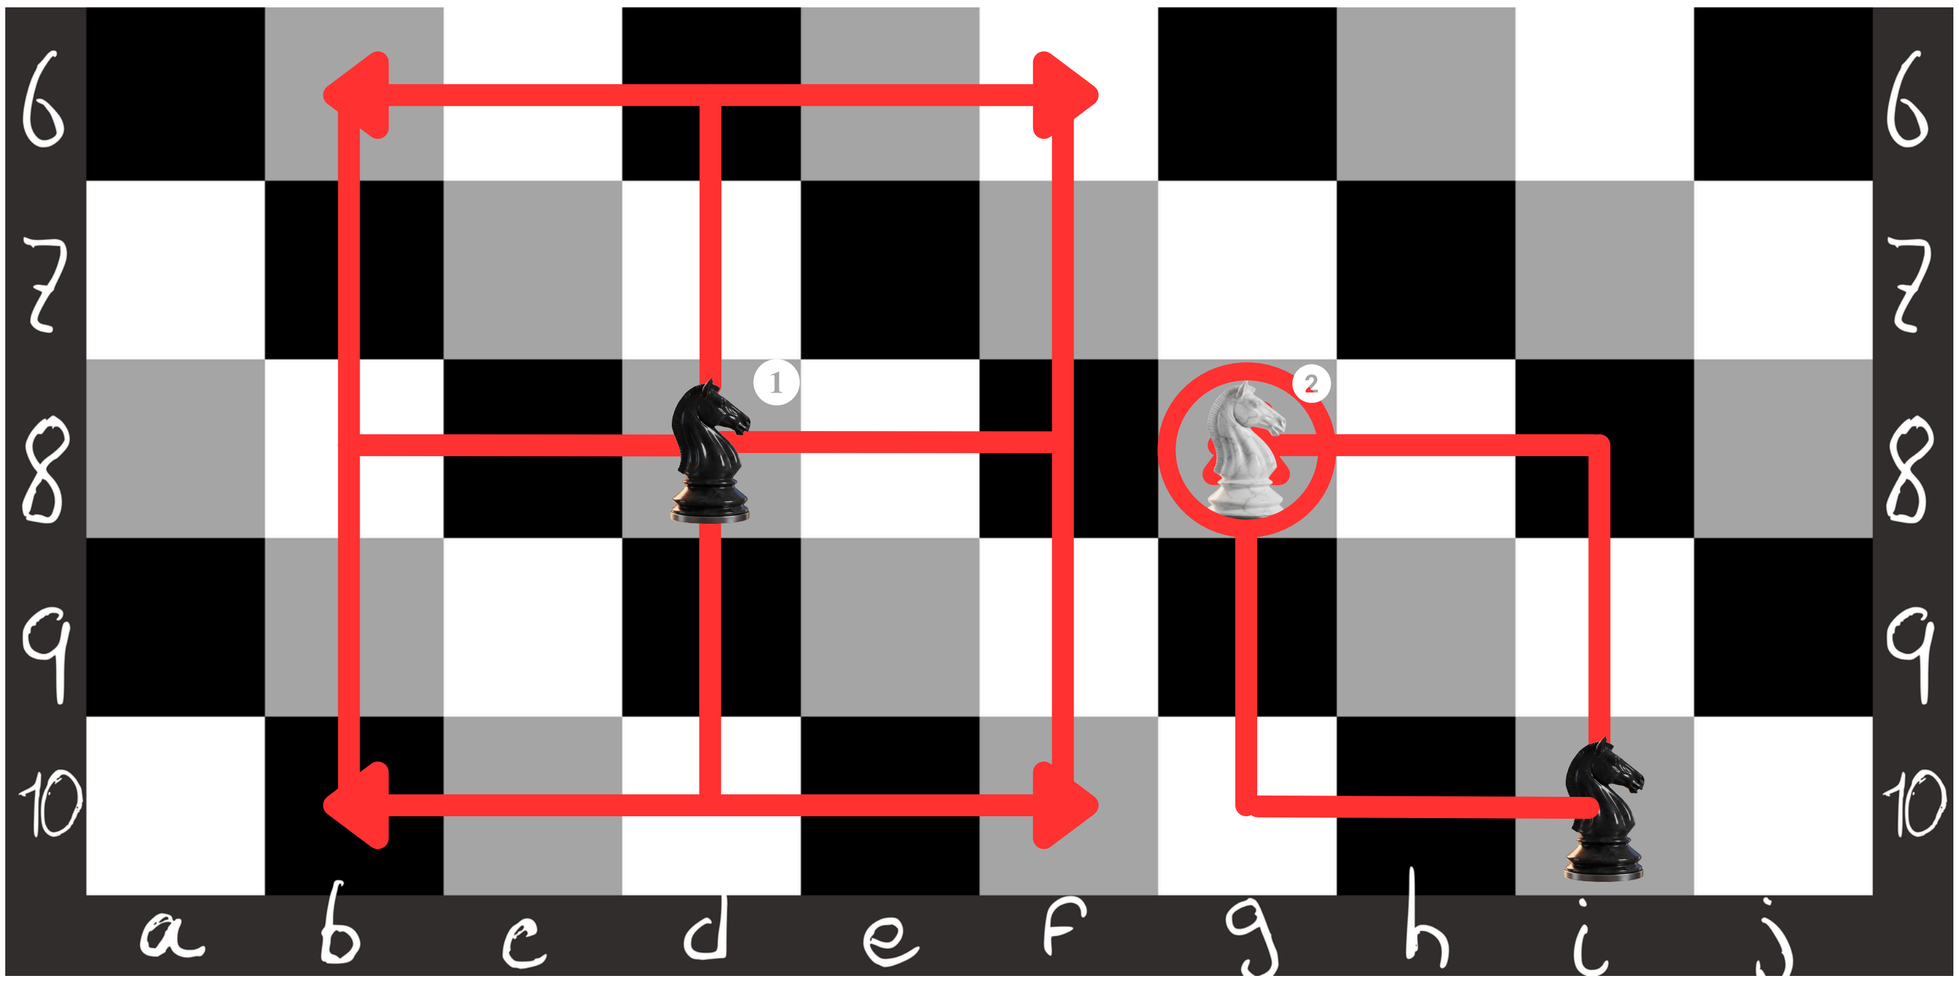
To eat (2): eat the piece that is in the place it ends up if there is one



Horses

To move (1): two spaces forward, backward, left or right, and two more spaces to the side. It can jump over other pieces.

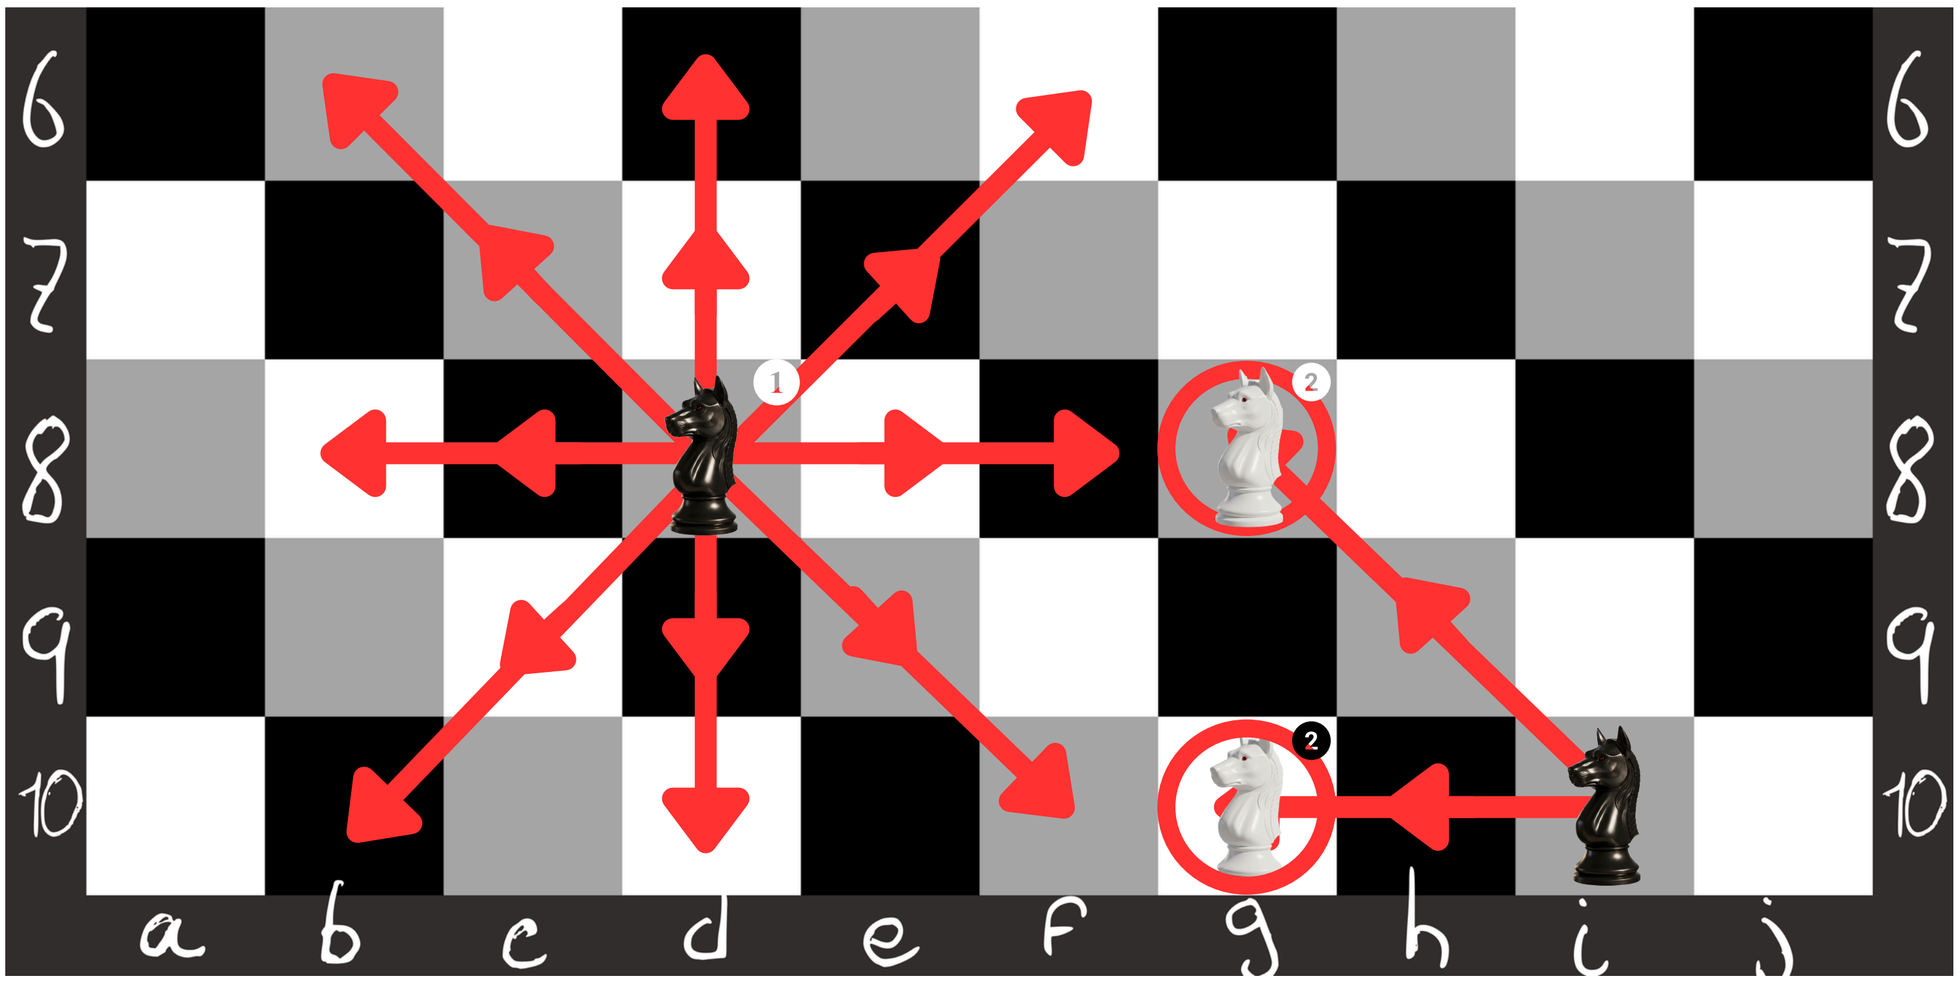
To eat (2): eat the piece that is in the place it ends up if there is one



Guard dogs

To move (1): one or two squares as the player wishes up, down, left, right or diagonally. They cannot jump over pieces.

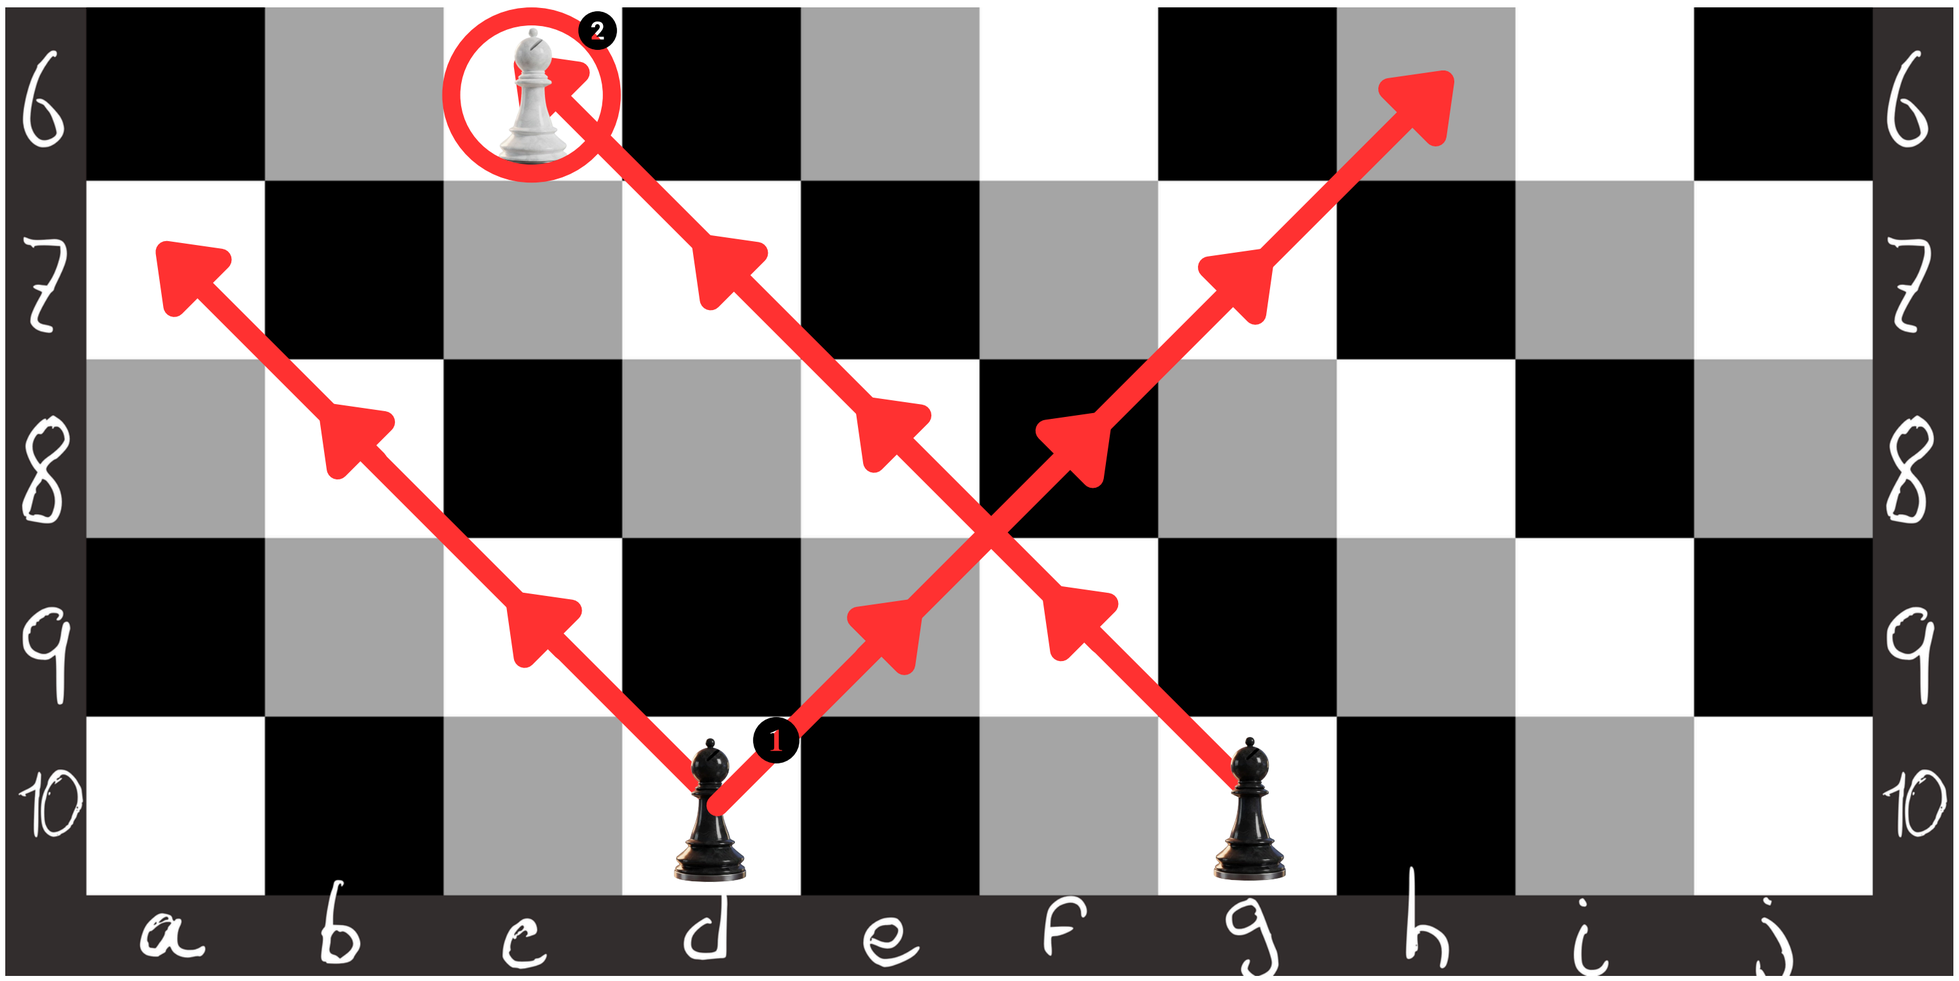
To eat (2): eat the piece that is in the place where it ends up if there is one.



Bishops

To move (1): the number of squares the player wishes along the possible diagonals. They cannot jump over pieces.

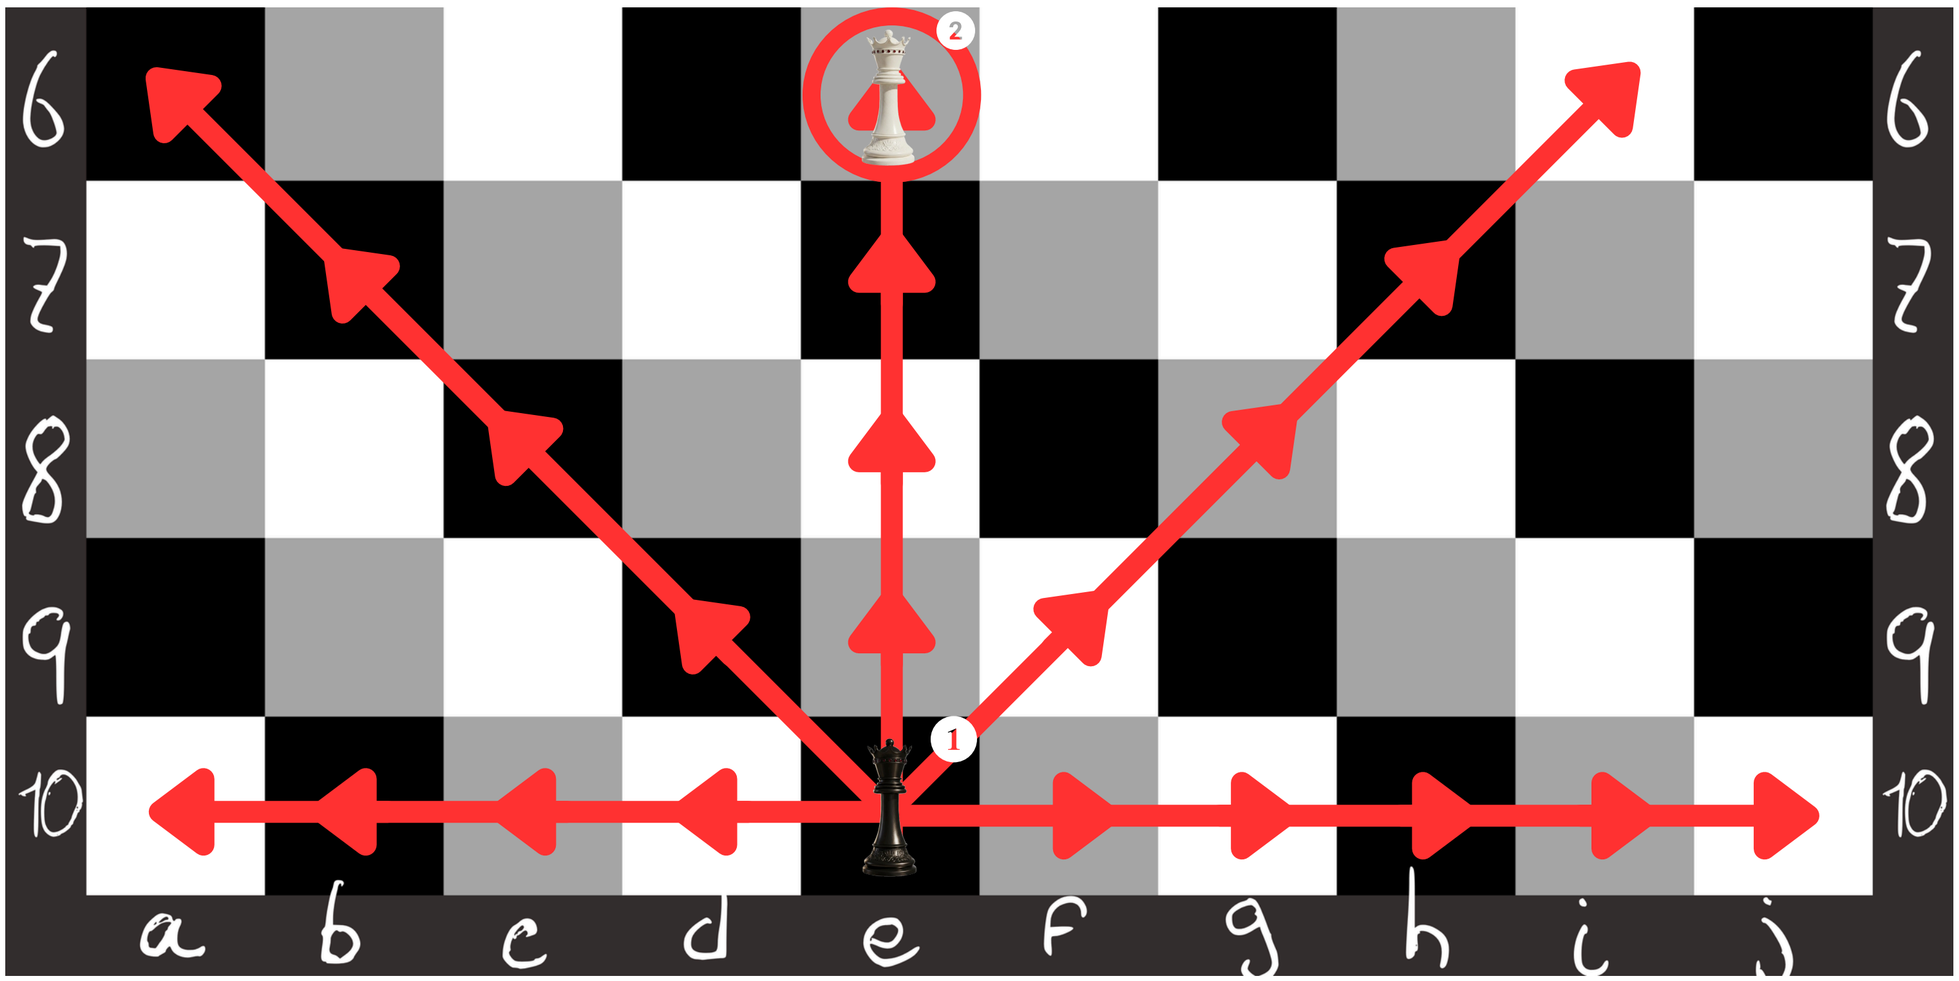
To eat (2): eat the piece that is in the place it ends up if there is one



Ladies

To move (1): the number of squares the player wishes up, down, left, right or diagonally. They cannot jump over pieces.

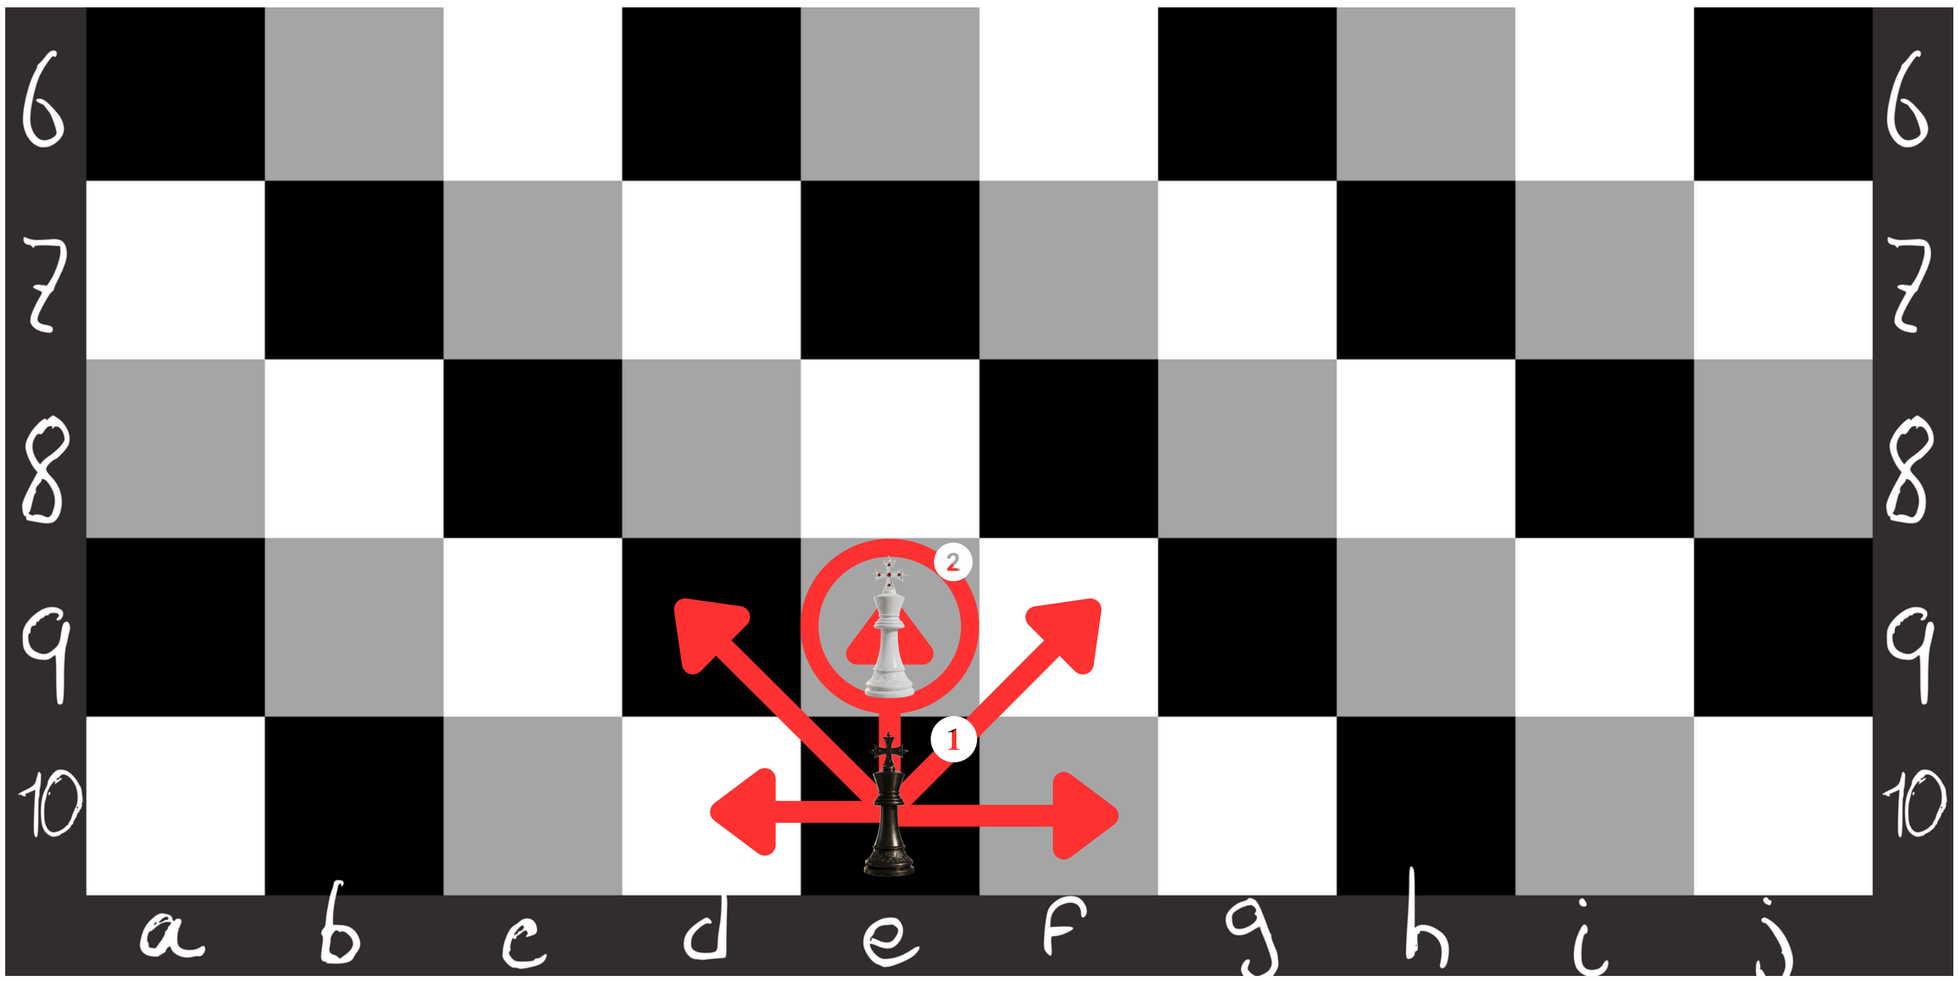
To eat (2): eat the piece that is in the place it ends up if there is one



Kings

To move (1): one square up, down, left, right, or diagonally.
You cannot jump over pieces.

To eat (2): eat the piece that is in the place it ends up if there is one



TIP: The white king will never be able to reach the position it is in, as it would be an illegal move, but it hasn't changed in this chess game, I've simply used it as an example.
